

EXPORT COMPLIANCE

Dixie Air Parts Supply is committed to full compliance with all export control regulations in accordance with the U.S. Department of Commerce, the U.S. Department of State (ITAR), and other U.S. agencies.

Our export compliance program has been in place for more than 25 years and is continuously updated to conform to the latest U.S. regulations in an effort to insure that sensitive commodities and technical data are not transferred to spurious entities, or those who might trans-ship these items to restricted organizations or countries banned from receiving such material.

We are proud to say that in our 47 years, we have never had an export violation.
